Installation of Meraki App

Dear Parents/Caregivers

In an effort to provide a safer learning environment in terms of internet usage, we are requesting that all students in Year 5 & 6/7 install a new App. The App is called Meraki and it is available from iTunes for free.

Meraki Systems Manager is a Mobile Device Management (MDM) solution that allows St Joseph's to manage multiple iOS devices from a central web dashboard. Systems Manager also makes it easy to define and deploy network settings like wireless connectivity and security settings, and will enable St Joseph's to protect your child/ren against inappropriate use of some apps and websites.

Please ensure that the App is installed on your child's iPad before commencement of Term Four. If it is not installed by this date, you child will not be able to use their iPad at school.

This App does not work unless it is synced to our school. In order for this to happen I will need the Apple ID you use on that device in order to join and then send you an invitation to Accept the School's Meraki Invitation.

Kind regards

Rika Andres
Assistant Principal

Installation of Meraki App

Child's name: _____

Name on iPad (can be found in Settings under General/About) _____

Apple ID associated with iPad: _____
If you're not sure how to locate the Apple ID for your child's iPad, go to Settings, select the iTunes & App Store tab, then on the top RH side is listed the magical Apple ID.

I agree to install the Meraki App onto my child's iPad in order to better secure security settings whilst at school.

Parent name:_____ Parent signature:_____
